Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Huebsch, et al.-5853422.

Huebsch discloses an occlusive device 10 having a plurality of spokes with bends in the middle. The device is releasably locked to a delivery catheter 40. An inner core has a twist lok mechanism 140 is used and allows the device to be held in both the reduced and expanded configurations. The twist lok 140 142, 144 are rotated to allow for the device to be released from the delivery catheter see col. 6 lines 1-12. Tissue hooks 70 may be used to anchor the device in place relative to neighboring tissue. See col. 7 lines 19-28.

Claims 1-8 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsugita, et al.-6371971.

Tsugita discloses a catheter 105 and an inner core 125 having a receptacle 135 having inner threads for receiving outer threads 136 on the proximal end of an occlusive filter basket made of a plurality of expandable spokes col. 13 lines 18-28 detail that a

rotational lock on the filter would allow for coupling to be rotated relative to the filter to allow its removal therefrom.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Glenn K Dawson whose telephone number is 703-308-4304. The examiner can normally be reached on M-Th 7:30-5:00.
